

PADI DIVEMASTER COURSE

If you want to become an internationally recognized dive guide and be able to work anywhere in the world, this is your course.

During the course you will improve your diving and rescue techniques. You will be coached to reach a professional level of teaching in the world of diving.

You will support your instructors during their courses and dives to learn how to make decisions in the organization of groups, supervision of divers, and improve the management and control of divers who need help.

You will be able to lead others as you supervise scuba diving activities and assist with diver training. You will receive training to carry out the Re-Activate program for certified divers who have not dived for a long time. You will also be able to carry out activities for freediving and snorkelling.

In our dive centre we offer you the option of being trained to become a Divemaster in exchange for working with us. If you would like more information about our Divemaster course, send us an email or call us.

This course includes:

- Teaching material and Divemaster kit with the obligatory and optional materials
- Complete equipment during the course (*if required*)
- Dives and training sessions
- All fees for the certification of the full course
